

## DATASET SELECTION & IMPORT

The screenshot shows the 'Dataset Selection & Import' section of the Power BI interface. On the left, there's a message to 'Manage and connect to recent sources.' Below it, a 'DATASET SELECTION & IMPORT' section with the heading 'Build visuals with your data'. It instructs users to 'Select or drag fields from the Data pane onto the report canvas.' A small icon illustrates this process. On the right, the 'Visualizations' pane is open, showing various visualization icons like charts and maps. The 'Data' pane is also visible, containing a search bar and three dataset entries: 'List of Orders', 'Order Details', and 'Sales target'. The 'Filters' pane is partially visible at the bottom.
